

MOHAK AGARWAL

Frontend Lead | Software Engineer | Full Stack Developer

Noida, India | +91-9565814426 | agarwalmohak25@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Frontend-focused Full Stack Engineer with 2+ years of experience building production web applications using **React.js**, **Next.js**, **TypeScript**, **Node.js**, **Express.js**, and **PostgreSQL**. Experienced in **frontend architecture**, **reusable component systems**, **REST API integration**, **state management**, **production debugging**, and **client-facing Agile delivery**. Currently leading frontend delivery for an enterprise market-research SaaS engagement, with hands-on exposure to **LLM workflows**, **RAG fundamentals**, **GenAI tooling**, and **workflow automation**.

Technical Skills

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, Express.js, React.js, Next.js
- **Frontend:** Frontend Architecture, Tailwind CSS, Shadcn/ui, Zustand, TanStack Query, Zod, Progressive Web Apps (PWA)
- **Backend & APIs:** REST APIs, Redis Caching, API Integration, Azure Blob Storage
- **Databases:** PostgreSQL, MongoDB, Supabase
- **AI & Modern Workflows:** GenAI Tooling, LLM Workflows, RAG Fundamentals, Prompt Engineering, Workflow Automation
- **Tools & Practices:** Git, Agile/Scrum, Code Reviews, System Design, Data Structures & Algorithms

Professional Experience

Frontend Lead / Software Engineer

Jasper Colin - Client-facing engagement via Ksolves

June 2025 – Present

Noida, India - On-site

- Lead frontend delivery for an enterprise **market-research SaaS platform**, owning architecture decisions, reusable UI patterns, code reviews, and feature execution using **React.js**, **Next.js**, and **TypeScript**.
- Build complex research workflows spanning diary studies, forums, interviews, synthesis/insight experiences, media-driven interfaces, and AI-assisted product flows.
- Collaborate directly with product/client stakeholders and backend, QA, and DevOps teams on requirements, **REST API contracts**, sprint execution, testing, releases, and production issues.
- Joined the Jasper Colin project through **Ksolves** as an on-site client-facing engineer, taking increasing ownership of frontend architecture and delivery.

Software Engineer

Ksolves India Limited

March 2024 – Present

Noida, India

Core Ksolves product work: March 2024 – May 2025

- **Warehouse & Vendor Management PWA:** Built and maintained responsive operational workflows using React.js, Zustand, TanStack Query, and REST API integrations.
- **Cluster Monitoring Dashboard:** Developed reusable API-driven views for cluster health, service status visibility, and day-to-day operational monitoring.
- Engineered reusable frontend utilities, including browser-based media capture using JavaScript Blob APIs, and contributed to shared component and integration patterns.
- Worked across production debugging, API integration, code reviews, release support, and cross-functional Agile delivery before moving to the Jasper Colin client engagement in June 2025.

Technical Projects

PG Manager - Property Management SaaS | *Next.js, Node.js, PostgreSQL*

- Built property lifecycle workflows for tenant onboarding, multi-property management, invoices, recurring billing, rent tracking, expenses, notices, and support operations.
- Designed backend APIs and PostgreSQL-backed modules for property, tenant, billing, and management workflows with a responsive admin experience.

VibeCheck - Personalized Digital Card Platform | *Next.js, Supabase, Razorpay*

- Built customizable digital cards with themes, media uploads, recipient share links, payment-gated publishing, and creator-side management flows.
- Implemented Supabase-backed data/upload workflows, Razorpay integration, protected recipient access, and expiring share-link behavior.

ERP Timesheet Utility | *Python, JavaScript, HTML/CSS*

- Created a lightweight ERP session-token utility with a responsive interface, browser-specific token retrieval guidance, and a dependency-light Python server.
- Added security-focused token handling guidance and a streamlined setup flow for reliable local and team usage.
